## No. 1. Population of New South Wales: Annual Estimates

Notes:—

1. The estimates of the population for periods between the 1961 and 1966 censuses of population and since the 1966 census have been prepared by adding to the population ascertained at the previous census the subsequent natural increase and estimated net migration. The estimated net migration component has been based on statistics of overseas migration by State of residence and estimates of interstate transfers of residence, with no allowance for holiday, business, or other similar short-term movements interstate. In population estimates shown for earlier years the net migration component was based on statistics of overseas migration by State of embarkation or disembarkation and approximate measures of all interstate movements. The population estimates have been revised in the light of the final 1966 census results.
2. Full-blood aborigines have been included in population estimates from 30th September, 1966, and in statistics of births and deaths (and hence, of natural increase) from 1st January, 1967. Differences between population estimates including aborigines and those purporting to exclude them should not be taken as a reliable measure of the number of full-blood aborigines.

## No. 8. Wage and Salary Earners in Civilian Employment in N.S.W.: Government and Private

(Excluding employees in rural industry, employees in private domestic service, and Defence Forces)

### Notes:—

- The current series of employment statistics is based on benchmark data derived from the 1954 and 1961 censuses of population. For periods between and since the censuses, the estimates are derived from:—
  - monthly returns supplied by employers for purposes of Commonwealth pay-roll taxation;
  - monthly returns from governmental authorities;
  - some other direct records of monthly employment (e.g., hospitals); and
  - estimates of changes in the number of employees outside the scope of the previous sources.
- Employees in rural industry and in private domestic service, and members of the full-time Defence Forces (including, from July, 1965, national servicemen), are excluded from the scope of the series.
- The series is designed to measure the *current monthly trends* in the defined fields. The estimates are compiled on an establishment or enterprise basis, and the benchmark data (which have been derived from industry tabulations compiled on the occasion of the population censuses from schedules provided by individuals) have been adjusted as nearly as possible to this basis.
- A new series of employment statistics for June, 1966 and subsequent months, based on benchmark data derived from the 1966 population census, will be developed in due course. In the 1966 population census, new work force definitions were adopted—as a result, some persons who would not have described themselves as being in employment at previous censuses (e.g. married women in part-time employment at the time of the census) were brought within the scope of the work force. The new employment series will accordingly be at a higher level than the current series.

\* Relates to industrial disputes involving a stoppage of work for a minimum of 10 man-days. The figures include the time lost by employees who worked in establishments where stoppages occurred but were not themselves parties to the disputes; they exclude the time lost, as a result of the disputes, by employees in other establishments.

Note. Tables 12 and 13 are based upon the records of the Commonwealth Meteorologist. The divisions correspond approximately with the statistical divisions shown on the map in frontispiece of the Official Year Book of New South Wales, each division being subdivided into two sectors indicated by the letters N, S, E, or W according as they constitute the northern, southern, eastern, or western portion of the division concerned. Normal Rainfall is based on a period ended 1929.

- (a) Excludes Albury (regarded as a Victorian selling centre). Weighted average, year ended June.  
 (b) Average return f.o.r. country rail siding, allowing for cost of bags and including governmental assistance to wheatgrowers. Pool season, generally year ended October.  
 (c) Basic selling prices of Australian Wheat Board for f.a.q. bulk wheat, f.o.b. Sydney. These quotations are more or less nominal, with sales being made above and below the basic price from time to time; for some destinations, where other exporting countries have a geographical freight advantage, actual selling prices are lower than the basic prices. Annual quotations are the average of the twelve monthly prices, year ended June.  
 (d) Price charged by Australian Wheat Board for bulk wheat for flour for local consumption, f.o.r. Sydney. Annual quotations are the average of the twelve monthly prices, year ended November.  
 (e) Weighted average price (per pound of commercial butter) paid for cream supplied to N.S.W. factories, inclusive of Government subsidy, year ended June.  
 (f) Weighted average price for choicest butter, f.o.b. Australia. Annual quotations are for year ended June.  
 (g) Price for choicest quality bulk butter supplied in 56 lb. boxes, delivered (including price of box). Annual quotations are the average of the twelve monthly prices, year ended June.

\* The value added to materials by the process of manufacture. It is calculated by deducting from the value of output (which is, in general, the value of goods manufactured) the value of materials and of fuel and power used. Value of production comprises salaries and wages, drawings by working proprietors, depreciation, insurances, selling expenses and other overheads, taxation, and profit.

† A substantial part of the increase in 1962-63 was attributable to a change in the method of valuing coal used as a fuel in the iron and steel industry.

Notes:—

1. The value of building jobs represents the estimated cost of the whole job when completed, excluding the value of the land on which the job is carried out.
2. Building is classified as government or private according to ownership.
3. The value of building jobs approved is, for private building, the value of permits issued by local government authorities to build in that part of the State (covering all municipalities and the larger residential areas within shires) subject to building control by local authorities; and for government building, the value of contracts let or work commenced and day labour projects authorised by governmental authorities.
4. The number of houses and flats approved is, for private building, the number covered by local authority permits to build; and for government building, the number covered by contracts let and day labour jobs authorised by governmental authorities.
5. Some building in rural areas is excluded.

\* Includes government-owned vehicles other than those of the Defence Services, but excludes tractors, trailers, caravans, and mobile plant and equipment.

† This series is based on the 1955 and 1962 Censuses of Motor Vehicles and the records of State and Commonwealth registration authorities, and involves a type classification which is standard for all Australian States. The series differs from the former series (compiled by the Department of Motor Transport), primarily because of differences in the classification of vehicles and in the method of treating cancellations of registrations.

## No. 63. Retail Trade: Value of Retail Sales in New South Wales

The figures shown below represent the sales of goods (as distinct from services, repairs, accommodation, entertainment, meals, etc.) by establishments selling retail goods from fixed premises, and include the retail sales of establishments principally engaged in wholesale, manufacturing, or servicing activities. The figures are estimates based on sample surveys and the results of the 1961-62 Census of Retail Establishments. All figures have been revised since last issue.

# No. 65. Instalment Credit for Retail Sales, N.S.W.\*

Note. This statistical series covers credit schemes which involve repayment by regular predetermined instalments and which relate primarily to the financing of retail sales of goods. It embraces hire purchase, time-payment, budget account, and personal loan schemes, but does not cover lay-bys, credit accounts not payable by regular predetermined instalments, the financing of sales of land and buildings, property improvements, and services (e.g. repair work and travel), and rental and leasing schemes. A number of previously published figures have been revised since last issue.

## No. 71. Index of Prices of Shares on Sydney Stock Exchange

This index relates to ordinary shares of the principal companies (excluding banking companies) listed on the Sydney Stock Exchange whose business in New South Wales is extensive.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per \$2 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 34 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares are issued.

## No. 72. New Money Capital Raised by Australian Companies

These statistics relate to new capital raised by companies incorporated in Australia and the Australian Territories, distinguishing between companies listed on the Australian Stock Exchanges (*listed companies*) and all other companies (*unlisted companies*). *New money raised* is the net amount of cash transferred from the investing public to the companies, and consists of the total amount of cash received by the companies less the amounts not involving a transfer of funds from the investing public (cash subscribed by associated companies, and other cash subscriptions used to redeem shares, debentures, etc. or to purchase existing shares, debentures, etc. in other companies). Borrowings by bank overdraft and temporary advances, deposits accepted by banks, insurance and pastoral companies, and building societies, and loans to authorised dealers in the short-term money market are excluded from the statistics. A number of previously published figures have been revised since last issue.

\* The total consideration for a parcel of land comprising two or more lots may be shown in the transfer document relating to each lot. From July, 1965, the overstatements which have been identified have been excluded; these amounted to \$39,429,000 in 1965-66, \$38,424,000 in 1966-67, and \$46,006,000 in 1967-68.

† Relates, for the most part, to mortgages in fixed amounts for fixed periods, and excludes fluctuating advances secured by mortgage. As consideration is not always recorded, the amount is understated. The figures exclude the consideration recorded in mortgages which are collateral with other mortgages.

\* Total earnings divided by total civilian employment expressed in male units. "Earnings" includes salaries, wages at award rates, overtime, over-award and bonus payments, commissions, etc., but excludes payments to members of the Defence Forces. "Male units" represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings.

† Includes Australian Capital Territory.

Note. Comparisons as to trend should be made for complete years or corresponding quarters, as the quarters are affected by seasonal influences.

## No. 97. Weekly Wage Rates, Adult Employees, New South Wales

(Weighted Average Minimum Weekly Wage Rates)

Note. The wage rates used in the series embrace a representative range of occupations, and are based on the occupation and industry structures in 1954. The wage rates used are the minimum rates payable—i.e., the lowest rate payable for a particular occupation as prescribed in a representative award, determination, or agreement—for a full week's work, excluding overtime. (The term "minimum wage" has been used by the Commonwealth Conciliation and Arbitration Commission since July, 1966, in a different sense—see note †, Table 98.) The rural industries are excluded from the scope of the series.

\* Quarterly adjustments for movements in retail prices were discontinued in State awards from June, 1964.

† The minimum wage payable to adult males under certain Commonwealth awards was fixed at \$37.25 from July, 1966, \$38.25 from July, 1967, and \$39.60 from October, 1968.

‡ In addition, an "economic loading" of \$1 per week was payable to all adult males and females under State awards. From 1st January, 1968 this loading was absorbed into the basic wage.

¶ From July, 1967, the separate specification of the basic wage, margin, and other elements of award wage rates in Commonwealth awards was discontinued. The total wage (i.e. basic wage plus margin elements) for each award classification for adult males and females was increased from the beginning of the first pay-period commencing on or after 1st July, 1967 by \$1 per week, and by a further \$1.35 from the beginning of the first pay-period commencing on or after 25th October, 1968.

## No. 99. Consumer Price Index

The Consumer Price Index is designed to measure quarterly variations in the level of retail prices for goods and services which represent a high proportion of the expenditure of wage-earner households. The Index covers a large and representative selection of commodities and services arranged in five major groups—food, clothing and drapery, housing, household supplies and equipment, and a miscellaneous group. Significant changes in consumer expenditure patterns have been reflected in the Index by the introduction of additional items and altered weighting patterns.

Base of each Index: 1952-53=100.0

## No. 100. Wholesale Price (Basic Materials and Foodstuffs) Index

Commodities are priced in their primary or basic form wherever possible. Prices are drawn mainly from Melbourne sources. Apart from locally produced building materials, and one or two minor commodities, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets.

**Base of each Group: Average of 3 years ended June, 1939 = 100**

## No. 101. Export Price Index, Australia

Notes: 1. The current Export Price Index is compiled as a weighted average of the relative price movements of 29 commodities, the weights being based on the exports (valued at 1959-60 prices) of the commodities in the five years 1956-57 to 1960-61. In these years, the selected commodities accounted for about 83 per cent. of the total value of Australian exports.

2. A comparable series of index numbers has been compiled by linking, at the year 1959-60, the "All Groups" Index in the current and previous Export Price Indexes. The index numbers (Base: 1959-60 = 100) for the years 1954-55 to 1958-59 are 114, 105, 117, 102, and 90, respectively.
